

UAB Prekybos namai Waldis products comply with:
COMMISSION DELEGATED REGULATION (EU) 2024/197
of 19 October 2023 amending Regulation (EC) No 1272/2008
as regards the harmonised classification and labelling of certain substances

SPECIFICATION

Non concentrated nitric acid

Nitric acid is one of basic products in chemical industry. It is used as raw material for fertilizer, sulphuric and concentrated nitric acid production; for metal etching processes. Nitric acid salts are used in agriculture, most of all in the form of ammonium nitrate produced by neutralizing nitric acid with ammonia. It is also used for production of complex fertilizers when natural phosphates are dissolved in nitric acid.

Product specification	Monomark standard
Appearance	Colourless or light brownish colour liquid with no foreign admixture
Mass fraction of nitric acid, %, min	56,0
Mass fraction of nitric oxides converted to N ₂ O ₄ %, max	0,1
Mass fraction of heated remainder, %, max	0,02

Packing: non concentrated nitric acid is poured into railway tank wagons, road tankers, in accordance with the applicable regulations, ensuring safe transportation and storage.
