1	Nitrogen content, %,	16	17	12	2
2	Phosphorus content, %,	16	17	24	18
3	Potassium content, %:	16	17	24	18

Use: This is a universal compound fertilizer of the highest concentration used for the fertilization of spring grains, rape, maize, orchards and gardens, meadow grounds and grazing lands. Broadcasting of the fertilizer during soil preparation before the sowing period, or applying locally during the sowing period. Fruit trees, meadow grounds and grazing lands should be fertilized in spring at the beginning of the vegetation of plants. When applying locally, the fertilizer dose can be reduced by 25 – 30 percent.

Package: big-bag 500 kg or bag 25/50 kg
