YEAST

Yeast No 2
TS 9291-002-44007032-04

Batch: 429

1	Raw protein %	58,8
2	Dry material %	90,0
3	Energy MJ/kg	11,76

Use: Yeast No2 is a mixture of the nutrients, which are essential to a valuable ration. Besides, medical and flavouring products, synthetic carotene are added in order to improve a feed structure and increase its assimilation, according to which quality production makes better, yolk color and chemical composition of eggs don't differ from domestic ones. In animal and poultry feeding an optimum quantity of albumen, fat, carbohydrates, mineral substances and vitamins was determined. While feeding domestic animals and poultry only with grain, an unproductive forage consumption increases greatly, an animal and poultry growth reduces, and, as a result, different metabolic imbalance and infectious diseases appear. In order to avoid such problems it is necessary to feed animals and poultry with balanced forage, which can be made mixing grain with albumen vitaminous addition. Albumen vitaminous additions are made of high-quality and ecologically clean stuff. In Yeast No2 composition there is an essential quantity of albumen, fat, calcium, phosphorus, vitamins and other substances, which are significant for optimum forage assimilation.

Package: big-bag 500 or 1000 kg

Transportation: railway or cars-track

Guaranteed shelf life: 1 year

Data of manufacture 2011 03 18

Origin Russia

Quantity 200 t

Data of shipment 2011 03 28
